FRONTY AKRYLOWE LASER EDGE / ACRYLIC DOORS / АКРИЛОВЫЕ ФАСАДЫ

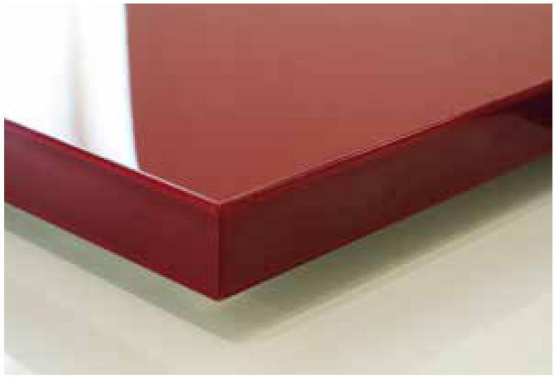

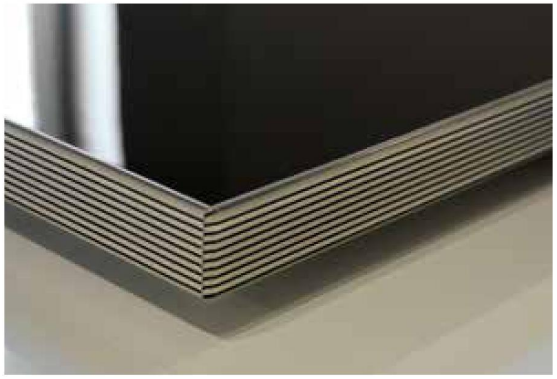

Fronty wykonane na bazie płyt MDF, które pokryte zostały matą akrylową o grubości 0,7-1,0 mm, są odporne na promieniowane UV i wilgoć, co zapewnia trwałość koloru. Dzięki bezspoinowym polimerowym obrzeżom RAUKANTEX pro laser edge łączenie płyty z obrzeżem jest praktycznie niewidoczne. W rezultacie cały element wygląda jak jedna bryła. Powierzchnia nie wymaga procesu utwardzania.

These are solid acrylic faced doors constructed with an MDF core and a 0,7-1,0 mm solid sheet of acrylic adhered to the face of the doors. The doors come in a variety of different colours and edged with RAUKANTEX laser technology creating a seamless join. Acrylic doors are durable, moisture-resistant and UV-stable so the colour will not fade over time.

Фасады на основе плиты МДФ, покрытой акриловым слоем 0,7 - 1,0 мм, устойчивые к ультрафиолетовому излучению и влаге, что обеспечивает их долговечность. Использование полимерной кромки RAUKANTEX pro laser edge позволяет достичь наиболее незаметного и герметичного шва между кромкой и плитой. В эффекте фасады выглядят как монолитная плита с бесшовным соединением.
